

The Leader in Wireless Solutions for Building Automation

AIC Wireless Releases New Wireless Protocol Solutions

June 11, 2008

For Immediate Release

AIC Wireless announces the release of the following additional products:

| | |
|------------|----------------------|
| WBT900 | Wireless BACnet MSTP |
| WBT900-IP | Wireless BACnet IP |
| WMT900 | Wireless Modbus RTU |
| WMT900-TCP | Wireless Modbus TCP |
| AIC485 | Wireless RS485 |
| AIC900E | Wireless Ethernet |

The release of these new products provides for needed solutions in the building automation market. The same reliable, plug-and-play features of the WLD900 apply with the new devices.

As a Vykron® Systems Integrator (Tridium), AIC Wireless recognized the need for multi-protocol wireless solutions. Reliable long range wireless solutions now exist for Building Automation, Energy Management, Security, Access Control, Lighting Control, Industrial Automation, M2M, Facilities Management and Remote Monitoring (kW, Gas, Flow, etc...).

AIC Wireless continues its efforts to provide reliable wireless communications systems for the building automation market.
